💼 PROFESSIONAL EXPERIENCE

Junior Backend developer | Intern, "WIN TO WIN" LLC
08/2025 – 09/2025 | Tashkent

- Developed and maintained RESTful APIs using FastAPI and PostgreSQL.
- Designed relational database schemas and optimized queries for performance and scalability. Implemented CRUD operations, authentication, and structured backend logic following clean architecture principles.
- Worked collaboratively in a team environment using Git-based version control.

Accountant, "UZBAT AO" JSC
09/2024 – 02/2025 | Samarkand

- Managed and maintained data in SAP, BATLeaf, and MS Excel systems.
- Processed large volumes of financial data while ensuring accuracy and data integrity.
- Collaborated with internal departments and users to resolve system- and process-related issues.
- Prepared reports and supported daily business and financial operations.
- Maintained accurate accounting records and ensured proper data management..

📁 PROJECTS

AResto — Restaurant Management & Ordering System,
React, TypeScript, Supabase, PostgreSQL | 2026
10/2025 – 06/2026

- Developed a full-stack restaurant management and ordering system for managing orders, menu items, tables, shifts, payments, and restaurant operations.
- Implemented separate workflows for **Admin, Kitchen, and Menu Management** roles with role-based access control.
- Built an **atomic order creation system using PostgreSQL functions**, ensuring orders, order items, and shift data are processed consistently.
- Implemented **real-time order updates** using Supabase Realtime for seamless communication between customer, kitchen, and cashier workflows.
- Developed payment management supporting **prepaid/postpaid orders, payment requests, and cashier payment processing**.
- Built dashboard analytics including **best-selling products, daily sales comparison, and busy-hours analysis**.
- Implemented table-based ordering and integrated **3D/AR food visualization** to improve the customer ordering experience.

Clean Master Website (clean-master.uz) 📄, Service website for cleaning company
03/2026 – 04/2026

- Developed a responsive and user-friendly website for a cleaning service company.
- Implemented SEO optimization (meta tags, sitemap, keywords) to improve search engine ranking.
- Created structured service pages (home, office, furniture cleaning) to enhance user navigation.
- Optimized website performance and content for better user experience and faster loading.
