
Bakhrom Vakhobov *Backend developer*

vakhobovbakhrom@gmail.com +998906551056 Tashkent
github.com/Vakhobov https://vakhobov.vercel.app/

EDUCATION

Bachelor of Software Engineering,
Millat Umidi University
09/2022 – Present | Tashkent
Academic focus on Software Engineering, Backend Development, Data Structures & Algorithms, Database Systems, AI/ML, Cybersecurity, and Linux-based system administration.

Full-Stack Python | Remote, *Mohirdev*
12/2023 – 07/2024 | Tashkent
- Gained practical experience in both frontend and backend development.
- Developed projects using Python, PostgreSQL, Django, Django REST Framework and FastAPI. Implemented RESTful APIs, authentication systems, and database design. Also gained solid frontend knowledge in HTML, CSS, JavaScript, and Bootstrap.
- Built full-stack applications following clean code principles and best development practices.

SKILLS

Programming Languages:
Python, JavaScript, HTML5, CSS3

Frameworks:
Bootstrap5, Django, Django REST Framework, FastAPI

Databases:
PostgreSQL, MySQL

Developer Tools:
Git, GitHub, Docker, Linux

LANGUAGES

Uzbek ●●●●●
English ●●●○○
Russion ●○○○○

PROFESSIONAL EXPERIENCE

Junior Backend developer | Intern, *"RAKUN AI" LLC*
08/2025 – 09/2025 | Samarkand
- Developed and maintained RESTful APIs using FastAPI and PostgreSQL.
- Designed relational database schemas and optimized queries for performance and scalability.Implemented CRUD operations, authentication, and structured backend logic following clean architecture principles.
- Worked collaboratively in a team environment using Git-based version control.

Accountant, *"UZBAT AO" JSC*
09/2024 – 02/2025 | Samarkand
- Handled large volumes of structured financial data, ensuring consistency, validation, and accurate database records.
- Worked with accounting software systems, improving data management workflows and reporting processes.
- Supported internal audits by analyzing system data and verifying transactional integrity.
- Contributed to process improvements and operational efficiency through structured data analysis and reporting automation.

PROJECTS

toshvziti.uz , *Toshkent Vaccines and Serums Research Institute – Official Website*
Institutional website for publishing research updates, news, and official announcements.
01/2026 – 02/2026
- Improved existing Django backend by fixing functional issues and enhancing content ordering logic (e.g., latest news and announcements displayed correctly).
- Resolved system inconsistencies and improved overall platform reliability and content accuracy.
- Enhanced application security and ensured safer production deployment.
- Collaborated closely with a frontend developer to redesign and improve the overall user experience.
- Participated in deploying the updated platform to a production environment (eskiz.uz), ensuring smooth release and stability.

Instagram Clone API, *Developed a RESTful backend system inspired by Instagram*
04/2024 – 06/2024
- Developed a scalable RESTful API implementing user authentication, post CRUD operations, and custom pagination.
- Designed and optimized relational database schemas using PostgreSQL, ensuring data integrity and efficient queries.
- Structured backend architecture following clean code principles and modular design practices.
